

A virtual competition in 2021

The 2021 Geneva International Exhibition of Inventions cannot take place in its usual format. No inventions and no public at Palexpo this year but a virtual event organised from 10 to 14 March. This special edition will offer inventors the opportunity to take part in the competition by submitting their inventions to a panel of judges via a 3-minute video.

2021 Inventions Geneva Evaluation Days - Virtual Event

The International Exhibition of Inventions will not take place but inventors from all over the world will have their inventions evaluated by a panel of professional judges during the "2021 Inventions Geneva Evaluations Days" which will take place from 10 to 14 March.

Three minutes to convince thanks to a video. About 600 inventions from about 20 countries will be judged on virtual platforms.

The Geneva International Exhibition of Inventions is the world's largest annual event devoted to invention. The organisers have decided to schedule this virtual event to remain connected to their inventors and to innovation at the international level.

The International Exhibition of Inventions will be back to Palexpo in its usual format in the spring of 2022 with the Climate Show as its guest.

Geneva, March 9 2021

(about 1'250 characters spaces included)
